OBJECTIVES

Passionate developer, skilled in frontend and software development, ready to embrace challenges and contribute to organizational goals. Thrives in environments that foster innovation and continuous improvement, relishing the opportunity to transform creative ideas into reality.

PROJECTS

ONE-STOP BANK APP

- Developed and hosted a comprehensive banking web application on PythonAnywhere using Django, Python, JavaScript, HTML, CSS, and Bootstrap, featuring account management, fund transfers, bill payments, and transaction history.

TECH-STORE WEBSITE

- Developed and hosted a full-stack tech store application on PythonAnywhere using Django, Python, JavaScript, HTML, CSS, and Bootstrap, enabling features like product uploads and account creation, along with admin functionality for product management.

MUSIC WEBSITE

- Built a dynamic music website using front-end frameworks, PHP, and MySQL, enabling users to listen to and upload music with secure registration, and featuring artist information pages, an official merchandise store, and a search bar for easy navigation.

IMAGE CAPTIONING

- Developed a deep learning model using CNN-RNN architecture with Inception-V3 for image feature extraction and LSTM for generating descriptions, trained on the Flickr8k dataset, and deployed it via Streamlit for real-time image captioning.

WORK EXPERIENCE

DEBUG DEPLOYMENT TECHNOLOGIES

Web development Intern

(02/2024 - 03/2024)

- Created and hosted a To-Do List website, a personal portfolio and responsive clone website using HTML, CSS, Bootstrap, and JavaScript.
